EDUSTRUCTURES PARTNERS WITH SERCO LEARNING SOLUTIONS

Relationship Assures Unprecedented Schools Interoperability Framework® (SIF) Solution Support for Schools, Local and National Education Authorities in The United Kingdom

SALT LAKE CITY, Utah—January 9, 2007—Edustructures, the leading provider of Schools Interoperability Framework (SIF®) solutions for the pK-12 education market, announced today that it has partnered with Serco Learning Solutions, a division of Serco Group plc (LSE:SRP.L), a leading international service company. As a Certified Solution Provider (CSP) for Edustructures SIF-based solutions, Serco Learning Solutions will act as a sales and support channel for Edustructures' market-leading SIFWorks® integration solutions in the United Kingdom. The two companies are currently working together on the implementation of the United Kingdom's first SIF proof-of-concept project at the Birmingham local authority (LA), based on the SIF Implementation Specification and utilizing the market-leading SIFWorks® Enterprise Zone Integration Server (ZIS) from Edustructures. The POC project includes data integration between systems within the LA and between the LA and the Department for Education and Skills (DfES).

“The initial successes shown by this groundbreaking proof-of-concept project has resulted in significant demand by both Local Authorities and solution providers in the UK for SIF expertise,” said Peter O’Hagan of Serco Learning Solutions. “Our relationship with Edustructures allows us to effectively respond to this demand with a thorough understanding of—and ability to support and implement—the most advanced SIF solutions, based on SIFWorks.”

<MORE>

Serco Learning Solutions has more than 10 years' experience supporting and assisting education management in the UK and abroad. Edustructures was the first and remains the leading provider of SIF-based solutions and services, chosen by more education agencies and serving more students internationally than any other SIF provider.

"The potential of SIF in revolutionizing education worldwide is limited only by the ability of vendors and service providers to respond to market demand with SIF-based solutions and services," said Steve Curtis, CEO of Edustructures. "We're pleased to be working with Serco Learning Solutions to expand the reach of SIF and thus, the success of education agencies throughout the UK."

About Edustructures

Edustructures is the recognized leader in SIF integration solutions for the pK-12 education market, making it possible for market-leading Student Information, Library, Transportation, Cafeteria and Directory solutions to reliably and securely share data in real-time. Through its SIFWorks® integration platform, comprehensive professional services, and business relationships with technology providers and educators, Edustructures connects the systems that power education.
